EDUCATION

DUKE UNIVERSITY, The Fuqua School of Business

Durham, NC

MS in Quantitative Management: Business Analytics, Strategy

May 2027

GPA 3.73; Innovation & Entrepreneurship Ambassador

Coursework: Strategic Management, Data Science for Business, Data Infrastructure (SQL), Business Fundamentals

UNIVERSITY OF CALIFORNIA, SAN DIEGO

San Diego, CA

BS, Cognitive Psychology with minors in Data Science and Design

Jun 2026

GPA 3.75, Revelle Honors

Elected UX Community Co-Chair, Cognitive Science Student Association; selected Orientation Leader,

Language Arts Writing Tutor, Research Assistant for Language Production Lab

EXPERIENCE

FATHER JOE'S VILLAGES

San Diego, CA

Innovating for X Intern - Basement @ UC San Diego

Jan – May 2026

- Drove product development of an AI-assisted voice-to-text MVP and end-to-end Figma prototype to auto-populate intake documents, improving data quality and increasing client-facing time for social workers at San Diego's largest homelessness provider, following HIPAA.
- Conducted market research, surveys, and interviews across eight+ departments; synthesized findings via Lean Canvas and presented at Demo Day during a 17-week entrepreneurial program.

PROJECT SEROTONIN

San Francisco, CA

UX Design Intern

(Remote)

Jul – Sep 2025

- Prototyped innovative precision health platform translating biomarkers into nutrition recommendations and a delivery feature, visualizing intake via Figma and Lovable AI.
- Conducted user and stakeholder research, developing product concepts and feature priorities
- Pitched ideas and refined user flows and information architecture with Product, UX, health science, and engineering teams through A/B testing and iterative feedback.

URBAN COLLABORATIVE PROJECT (UCP) GREEN CORRIDOR

San Diego, CA

UX Researcher / Data Analyst

Mar – Jun 2025

- Orchestrated user research with Caltrans, UCP Green Corridor, UCSD, and residents for an urban placemaking project in a marginalized Southeastern San Diego community to improve quality of life.
- Translated empathy maps, personas, and Python-based data analysis into a scaled AutoCAD design and \$680K cost estimate, addressing 87.5% of community-requested features.

DATA ANALYTICS PROJECTS

Steam Bundle Recommender (Python, Pandas, Scikit-Learn). Built ML classifier predicting bundled games receiving reviews; tuned Logistic Regression, Decision Tree, and Random Forest to 81.8% accuracy and 0.91 ROC AUC. Evaluated seven recommenders including collaborative filtering, matrix factorization, and learning-to-rank; User-User CF reached 52.6% Hit Rate@10.

Code Blue Prints (D3.js, JavaScript, HTML/CSS). Modeled 3D hospital environment in Spline with Three.js, mapping journeys across 20+ rooms to set patient expectations; engineered Python pipeline on MIMIC-IV data to analyze length-of-stay, mortality, and care-unit utilization, powering D3.js dashboards for patients and staff.

Recipe Analysis and Modeling (Python, Pandas, Scikit-Learn). Analyzed nutrition-rating relationships across 230K+ recipe records, testing calorie-group differences via bootstrapping, permutation tests, and KS statistics. Tuned Random Forest model with GridSearchCV, improving R^2 from 0.41 to 0.97.

SKILLS

Product: Product Management, Agile/Scrum, PRDs, Prioritization, Stakeholder Management, MVP Development, Prototyping, User Flows, User and Market Research, Usability Testing, Lean Canvas, Figma, FigJam, Framer, Miro, Notion, Qualtrics, Lovable AI, CAD
Data and Analytics: SQL, Python (Pandas, NumPy, scikit-learn), R (dplyr, ggplot2), Java, Git, A/B and Hypothesis Testing, Regression, Causal Inference, Machine Learning (Decision Tree, Random Forest, KNN, k-means), Data Visualization, Recommender Systems

ADDITIONAL INFORMATION

Creative writer published in two anthologies and dystopian fiction enthusiast; performed as a scare actor for 1,600+ visitors while building animatronics for UCSD's Haunted Maze; recreational fencer. Native English and Hindi, basic French.
